Spill procedure

1. **Assess the risk:** Assess the spill and identify the source. If you are unfamiliar with the liquid and its chemical properties, leave the area and contact the appropriate authorities.
2. **Protective clothing:** Wear protective equipment appropriate to the situation. If the source or substance cannot be identified, assume the worst.
3. **Contain spill:** Contain liquid and seal drains.
4. **Stop source:** Turn off faucets, rotate perforated drums and plug leaks where possible and safe to do so. Begin clean-up Use Brady SPC absorbents to safely clean up spills.
5. **Contact authorities:** Report the spill to the appropriate legal authorities in your community. Be sure to file all necessary reports in accordance with local laws.
6. **Dispose of used materials :** Absorbent materials take on the characteristics of whatever they absorb. Be sure to dispose of used sorbents and spilled liquids in accordance with local laws.
7. **Decontaminate:** Clean all tools and reusable materials appropriately before reuse.
8. **Replace absorbent materials** and safety equipment used in any clean-up operation.
9. **Review contingency plans and procedures!**
