Tufftech leather
Leather coated with a polyurethane based compound, applied at a high temperature under high pressure. Resistant to abrasion and liquids. It has an antibacterial and antifungal treatment. Resistant leather works well in environments where regular leather would disintegrate

Double density injected nitrile rubber industrial sole, resistant to oils, acids, heat and electric shocks.

Removable memory foam insole for better support of your feet to get you through the day

Protective steel toe cap with Lenzi anti-puncture sole

Cambrelle lining keeps the foot cool and dries quickly, odor and mildew resistant

Care Guide

A good way to keep leather boots longer is to clean them regularly.

- To start, take off the laces and clean with hot water and a shoe brush removing dirt
- Remove pebbles stuck in the sole
- Wipe the boot with a dry cloth and air dry only
- DO NOT clean with harsh soap as this removes natural oils from the leather and makes it more rigid

General tips

- Try the boots on both feet, as both feet can be different sizes.
- Boots should fit snugly at the heel and ankle when laced up.
- Wear your work stockings during the fitting
