

# SUPERA™ FR | NWKVFR

Fire-resistant neck gaiter that is ultra soft and non-irritating for all-day comfort

### ABOUT THE PRODUCT

This fire-resistant (FR) neck gaiter is designed for maximum comfort and all-day wear with a two-layer Kermel®-viscose blend that is non-irritating and feels soft against the skin. Even better, the fabric's inherent FR properties won't diminish with laundering, allowing for easy refresh between uses. It's an excellent choice for construction, mining, utility work, and jobs that involve oil and gas. It's both NFPA 70E compliant and CAT2; Ebt 16 cal/cm².

### ALTERNATIVE VERSIONS

WCKVFR, BAKVFR
