Care and Cleaning

YNK001 Washing station YNK002 Towel

Glasses should be clean daily

- Use Kosto cleaning products, YNK001 and YNK002 for better results
- Or clean lens with running water and mild soap free of wax and grease (which may interfere with anti-fog properties) and rinse the lens with clean water, shake off excess water and air dry.

Handle with care so as not to scratch the lenses to avoid damaging vision and weakening the lenses.

Store them in a clean, dry place where they cannot fall or be crushed.
